Core Services Web and Apps Activity go/gsuite-waa

G Suite Search Activity G Suite Activity Controls Web and App Activity

Rio Akasaka

[REDACTED]avidmonsees[REDACTED]m these are my best candidate names that I'd like to run by user research next week. Let me know if you have any preferences (I was asked to constrain the list to 3, and I figured I'd keep the current one as a baseline)

Chris Ruemmler

Web and App Activity is the worst name ever. This is part of the problem with the WAA bit. What does it ACTUALLY control? It is not obvious at all from our documentation. We need to be very clear about what is controlled by this flag.

Rio Akasaka

Preliminary data suggests "G Suite Search Activity" appears to be fairly popular and understood by admins.

Chris Ruemmler

[REDACTED]

to that name as long as it only controls Search activity and not all App activity in the Core Services.
